# THE QUARANTINE BURNING.

The Investigation at Stapleton, S. I.
TESTIMONY OF FORMER HEALTH OFFICERS—HOW
QUARANTINE HAS BEEN MANAGED—FREE EGRESS ALLOWED TO THE GROUNDS—NO PASSES REQUIRED— EVIDENCE OF DRS. WESTERVELT, BOARDMAN, HAR-COURT, LEE, HARRIS, HOBBS AND MR. LOCKE, UNITED STATES BOARDING OFFICER—ALL CONGUE IN THE EXPEDIENCY OF REMOVING QUARANTINE.

The investigation into the alleged charges of arson preferred against Mr. Ray Tompkins and Mr. Thompson, was resumed on Saturday morning, before Judge Metcalfe, at Stapleton, Staten Island, when some interesting testimony

The defendants, with their counsel, were present, but the court room was not much crowded.

The first witness examined was Dr. James S. Westervelt, who deposed that he was Deputy Health Officer from 1823 to 1826, and Health Officer from 1829 to 1836, he notified that during that time upon the appearance of postilential disease, all the employes connected with the Quarantine establishment, including Custom House officers, were prohibited from having any intercourse with the city of New York; the whole population at that time was composed of persons connected with the establishment, the neighborhood being a part thereof, and was occupied by stevedores, passengers, &c., who formed the population, and hence any restriction in regard to the neighborhood of Quarantine was deemed unnecessary; I know that of late years the intercourse between the Quarantine people, including boatmen, doctors, &c., and the village and city was permitted to a greater extent even when pestilential disease was prevalent in the hospitals and at Quarantine; he seidom went out without meeting some person belonging to Quarantine; within the last ten days he observed the first vessel which arrived with sickness, and in the papers next morning saw, in large capitals, "Sickness at Quarantine," "Yellow Fever in Port, &c.;" this had the effect of causing general apprehension and siarm; has seen general consternation and siarm in consequence, and people refused to visit his family; a strong instanse was that fiss own daughter was a schoolfellow of Miss Verplanck; his daughter visited this lady at Fishkill in June last; she was to have returned the visit in August last, but wrote to say she could not, because her grandfather, Julius C. Verplanck, said that yellow fever was on the island; this debarred the people from intercourse with their friends; a few days ago witness saw children running about the streets, and asked why they did not go to school, and they said they could not, because the bouse was in the neighborhood of Ragpickers' row; it is not the court room was not much crowded.

for the safety of the population at Staten Island as well as at New York and Brooklyn.

James R. Boardman, M. D., examined by Mr. Anthon—Has been practising physicans for twenty-six years; practised in Staten Island since 1833, and has been familiar with the spread of yellow fever since that time as detailed by other physicians, has had no cases this year; does not consider it possible so to isolate the present location of Quarantine, if the anchorage be included, as to make it safe for the inhabitants of Staten Island; has ridden a mile around the shore in the middle of the day in 1848, without meeting mere than three people, as, in consequence of the spread of the disease, they had all left the island; the disease was endemic at Ragpickers' row this season; the cases at Townsend dock were rather sporadic. Br. Isaac Lee was the next witness. He testified to the erection of the barricade in 1856, when he was Health Officer to the Castleton Beard of Health, and their being form down by people from New York—so be understood. In 1858 the yeelow fever came from infected vessels which arrived from the West Indies and New Orleans; the direct cause was in consequence of the preximity of those vessels to the shore. From all he could learn in regard to the prevalence of the disease in Ragpickers' row, it has been introduced by clothing brought from the iron scow.

Cross-examined by Mr. Peckham—Gave Dr. Harris permission to go outside the barricade, but did not give it to any of the doctor's people.

Mr. Peckham—He swears he did.

Mitness—I did not, sir; the yellow fever ceased after the barricades were thrown down; had there been any more cases I should have put them up again; the yellow fever was epidemic in Ragpicker's row; the barricades were three during the erection of the barricades, as usual, stevedores came out from the Quarantine grounds previous to the erection of the barricades, as usual, stevedores came out from the Quarantine grounds previous to the erection of the barricades in 1856; have no Rnowiedge of a

dores, however; sax of these were patients of mine; four out of the thirteen died; each one of these sick informed me that they came imprediately from the ship and through the Quarantine home; these men lived in Rocky Hollow, Southfield, near the village; the population there is equally dense as it is here; the James Gladdon was the worst infected ship here that season; scarcely a man who went on board her but sickened.

To Mr. Anthon—There were cases of sickness in 1856, caused by infected agricles being thrown overboard; the Board of Health of the town collected those materials and borned them; one of the cases caused by these articles was that of Mrs. Hadey, of Clifton, who broughth bed found floating in the bay to her house; there was also the case of John Selvey's one; John was employed in collecting these articles, but I don't think think he had the disease, though his son died of it; and there has been a case in that house since of a man who died, and is succeed to have contracted the disease in the nanner meationed; that section of the shore seems most exposed.

To Mr. Peckham—So far as I knew, these boatmen and bargemen have been accustomed to live this way in the village; some lived inside, and some lived on.

Dr. James Haccourt examined by Mr. Anthon—I have been a practising physician for twenty-eight years; I have been a practising physician for twenty-eight years; I have been a practising physician for twenty-eight years; in have been the Assistant Health Officer of quarantine; I knew of smallpox and cholers having been apread through the village from the Quarantine, but I cannot say to what extent outside the walls; the cases were in the immediate meighborhood, near the shanties, in the village of Tarrity Valley, on the west of the wall; this was in 1884, I believe; smallpox was communicated, I think, by persons going outside the walls who lind been attending on the sick in the hespital; cases have been directly traced to such a source; I think one of these cases, the wife of Ir. Vandyke, occurred

it was the same as usual as far as I know, the present Quarantine location cannot be made perfectly soluted, so as to maure Richmond, Kings county, and New York from peetilential diseases.

Cross-canning by Mr. Peckhum—I have been in the establishment since I was quite a list. I was there at first as an attendant, if you plenner, I have lived on Staten beland all my life, nearly fifty years I was next engaged in putting up the prescriptions and distributing medicines and remained so for free years, during which time I was studying medicine; I graduated in 1831 and remained as apothecary till 1856, when I was appointed physician to the hospital, the proximity of the houses where the cholera patients were ledged induces me to believe that the cholera was communicated the cholera broke out in other hospitals ten times as far as these bouses in Thrifty Valley were situated; there was no cholera I am positive in this county in 1864, but what was communicated from the Quarantine Hospitals; I do not know whether there was cholera in New York and Brooklyn in list year. I attended some of the cholera patients in Thrifty Valley during my connection with the Quarantine I have frequently attended patients outside the wails; I did not think there was any danger to the public to be appelended, as I could not carry yellow fever in my pocket; we do not know how cholera in produced; it is atmospheric probably. I have never known of an instance of cholera being indigenous to the island, but it often happens that a case of cholera of 1802, which went all over the country, we believe was brought here from Europe in ships.

A recess was then taken for dinner, after which the cross examination was proceeded with.

For the last ten years there has been a gate keeper at the south entrance of the Quarantine grounds; he does not refuse any person entering from the village, I mean to say any one from the yillage may ever without a permit for the last five or six

years; no one has been preparted; I don't wish to be understood as saying that the cate keepers permit persons from leaving the grounds without a pass—sallors from infected vessels—I mean to say that no one from the village has been refused admittance to the grounds except they were obsorious to the powers inside; I know that Mr. Tompkins was refused myself the other day; I was admitted one day and refused admission on the other; this was after the burning; I have no personal knowledge that a dozen persons that were admitted within the last five years had a permit or not; I did not see the infected rags and bedding from the ship Gliddon on the United States dock, but Dr. Thompson told me they were there, and I advised him to get rid of them as quick as he could; so far as I know the mode of getting and washing the clothing was properly conducted inside the walls; I had no official connection with the Quarantine establishment since 1855; I have been practising physician outside the walls since that time.

To Mr. Anthon—I attended the wife and mother of John Randolph this summer; their disease was yellow fever; ticorge Randolph, brother of John, is a boatman at Quarantine; he lives with his father and mother.

To Mr. Peckham—It was about the year 1846 that Dr. Vandyke went to the public meeting; I was not with him; I only heard so.

Dr. William Hobbs was next examined, and testified as follows:—I am a practising physician; have been so for the last sixteen years; I was deputy Health Officer in 1856 during the yellow fever season; I have had cases of yellow fever under my charge, both here and on the island of Cuba; during the time I was in the Quarantine, people used to pass in very freely, and more so than what I considered to be consistent with safely; my private opinion decidedly is that so far as the health Officer in 1856 during the yellow fever season; I have head to head and to difficulty in gaining admission; I was not work to the Health Officer were to board vessels according to the Health Officer a inst

Aughter.)
Mr. Peckham—Well, I don't want that. I will escape

from it by taking that answer.

Cross-examination resumed—The Quarantine is not isoted enough.
To Mr. Anthon—I have had experience of yellow fever To Mr. Anthon—I have had experience of yellow fever in Norfolk: I was there during the epidemic for three months; I went there and offered my services to take care of the sick, like many other physicians; I had more than forty under my charge; when Dr. Thompson appointed me he merely put me in a boat rowing about the bay; I thought I should have been placed in the hospital to take charge of the yellow fever patients, after my experience of that disease.

To Mr. Peckham-I practised medicine in Cuba about or years. Dr. John T. Harrison was next examined. I am a phy

In years.

Dr. John T. Harrison was next examined. I am a physician of fifty years standing; I was appointed Deputy Health Officer at Quarantine in 1811; since 1829 I have lived six miles off from Quarantine: I saw some cases of yellow fever on the island in 1847; I don't think the Quarantine establishment insures the safety of the residents of Richmend, Kings and New York counties as it did formerly; my reasons are that the population has increased since 1829, and the communication to the city is much more frequent and open, and the number of vessels arriving from inter-dropical latitudes have greatly increased, and the danger from infected vessels also; ferry communication by steamboat commenced in the year 1816 or 1817.

Richard Adams Locke, United States Boarding Officer was the next witness. He deposed as follows:—I reside on the government property within the Quarantine enclosure; my effice until recently was situated near the Health Officer and Physician's; for the past thirteen years I have been pretty cognizant with Quarantine; I have resided inside for the past five years and have not been absent scarcely a day: I remember the yellow fever epidemic in 1848; I was at that time connected with the Government Boarding Office; that year there were several vessels at the dock from Vera Cruz, and it is supposed that parties who were fishing caught the fever; at that time there was no restriction to parties coming inside the grounds and fishing off the dock; having had the disease in my own family at that time, I commenced to examine its character; I observed great destruction of life from the mingling of the slek and the well within the walls.

Mr. Peckham objected to the evidence—the witness was not a medical man.

Mr. Peckham objected to the evidence—the witness was not a medical man.

Evidence admitted.

Examination resumed—I have observed what was a notorious fact, that the sick were mingled with the well; I know that at the time yellow fever prevailed at Bay Ridge, there were five evisels recorded on my books as infected vessels, and that they were anchored off the Long Island shore; as soon as the vessel anchors we board them and never was for the Health Officer; our force at present consists of eight boatmen, two night inspectors, three assistant boarding officers and myself; of late years but little cargo is taken in at the government stores at Quarantine, in consequence of the Atlantic docks; the witness then testified to the danger which resulted from the steam arising from the washhouse, where the infected ciching was cleaned; he cumerated the deaths which had occurred among the employes of the washhouse, and the proximity of it to the government store and revenue officer's residences; there has never been an exception for the last five years to the road running in front of the hospital being a thoroughfare; persons residing at the north side always passed through to the ferry boat; I the last five years to the road running in leant of the hospital being a thoroughtare; persons residing at the north side always passed through to the ferry boat; I cannot say what restrictions there were as to persons visiting the hospital; I have frequently met the orderlies and nurses of the hospital with the solled linen and clothing on the sidewalk; with the exception of some employés, and when the baricades were up I have never known of any personal quarantine being imposed on the government officers or boarding officers; I have never known of a strict personal quarantine, except the case of Mr. Ray Tompkins; it has been examinally the practice to detain a steamer that touches at Havana long enough to discharge her passengers and their luggage, to go up by the ferry or steaming, and I have often known these vessels to be let up in an hour; the funigation of vessels and ventilation of baggage have been only nominally practised; only as a matter of faver, and sometimes not at all; New Orleans baggage has been mixed with Havana baggage and not opened at all; the Havana baggage is opened by the government officers, and it is the common practice to send up New Orleans baggage to the city without opening it at all.

The investigation was then adjourned till Monday morning, at ten o clock.

The Seventy-first Regiment to Encamp at Quarantine.

REGIMENTAL ORDERS, NO. II.

HEADQUARTERS, NEW YORK, Oct. 2, 1858.
